December 15, 1920.

Mutual Packing Co.,  
916 White Building,  
Seattle, Washington.

Gentlemen:

A report on fishery operations by your company in Alaskan waters during the season of 1920 has been received to-day. This report is incomplete in several respects and additional blanks are forwarded herewith in order that proper reports may be made.

The Bureau is advised that you operated two floating canneries in Alaska this past season. Separate reports should be made for them stating the location at which operated. Value of plant, including land, buildings, and shore equipment, should cover the floating canneries and equipment in Alaska but not the plant at Anacortes. It is further noted that no gear is shown on the report received although fish were reported as taken by seines and traps. Proper entry should be made of gear operated for each cannery, or if fish were purchased the name of the seller should be given with quantity purchased and the locations from which taken. Complete segregation should be made of operations of the two plants.

Upon receipt of these reports they will be substituted for the one received to-day.

Very truly yours,

H. M. Smith

Commissioner.

Inclosures.
